PROJECTS

ICSM Creatives Booking Management System with Decision Support System (Capstone Project)

- Designed and developed a booking management system using PHP and MySQL.
- Streamlined client bookings and improved scheduling efficiency through automation.
- Implemented a decision support feature to assist in booking and scheduling management.

OJT Coordinator System in CVSU Imus (Capstone Project)

- Developed a system for recording and monitoring intern actions and attendance.
- Maintained intern activity logs and generated reports for tracking purposes.
- Ensured accurate monitoring of internship progress through a web-based platform.

Explories Shoes: E-commerce Website (Group Project)

- Developed an e-commerce website using PHP and MySQL.
- Implemented product listing, shopping cart, and order management features.
- Designed user-friendly navigation for better customer experience.

Arduino Automatic Food Dispenser (Group Project)

- Built an Arduino-based automated food dispenser with a timer scheduling function.
- Enabled precise and scheduled food distribution using embedded system logic.

Take My Coffee Out – Mobile App (Personal Project)

- Built a cross-platform mobile application for a local coffee shop using React Native, Expo, and Firebase Firestore, featuring a real-time order management system synced between customer and owner devices.
- Developed key features including a digital menu with photo uploads, customizable order options, owner dashboard with PIN authentication, and an automated loyalty stamp card system.

CERTIFICATION

Computer Literacy Training Program – Adamson University (2017)

- Proficiency in Microsoft Office tools and basic programming concepts
